

Assignee: Intel Corporation

IN THE APPLICATION

The office action mailed on January 11, 2005 indicates that the Attorney Docket Number is **P17699**. This is not correct and is probably due to typographical error by the applicants in previous filings.

Please help correcting the Attorney Docket Number to reflect **P17700** in all documentations associated with this application.

A similar request to correct the Attorney Docket Number to **P17700** was filed with the Preliminary Amendment on February 12, 2004.

IN THE CLAIMS

Please cancel claims 1-20 without prejudice.

Please amend claims 21, 26, 27, 29, 32, 33 and 36.

Unchanged claims are included for the convenience of the Examiner.

1-20. (Canceled)

21. (Currently Amended) An apparatus, comprising:

a keyboard tray including a wireless keyboard, the keyboard tray coupled to [and] a stand, the keyboard slide-able into or out of the stand, wherein the stand is coupled to a housing and foldable relative to the housing, and wherein the housing includes a display screen and a carrying handle.

22. (Unchanged) The apparatus of claim 21, wherein the stand is to support the housing in a substantially upright position

Assignee: Intel Corporation

23. (Unchanged) The apparatus of claim 21, wherein the housing further includes an array of two or more microphones and a video camera, wherein the microphones, the video camera, and the display screen are oriented in generally same direction.

24. (Unchanged) The apparatus of claim 21, wherein the housing further includes a wireless communication interface to receive wireless signals from a remote control.

25. (Unchanged) The apparatus of claim 24, wherein the keyboard tray further includes the remote control and a telephone handset.

26. (Currently Amended) The apparatus of claim 25, wherein the remote control is to communicate with the wireless communication interface using Bluetooth communication protocol.

27. (Currently Amended) A system, comprising:

a processor;

a display coupled to the processor;

a first communication interface coupled to the processor, wherein the display, the processor and the first communication interface are included in a housing; and

a wireless telephone handset coupled to the first communication interface to be used for voice over Internet protocol (VoIP) calls, wherein the wireless telephone handset is included in a keyboard tray [having] coupled to a stand, the stand is to support the housing in a substantially upright

Assignee: Intel Corporation

position.

28. (Unchanged) The system of claim 27, wherein the first communication interface is to be used for short range wireless communication.

29. (Currently Amended) The system of claim 28, wherein the short range wireless communication is based on Bluetooth communication protocol.

30. (Unchanged) The system of claim 27, further comprising:
a second communication interface coupled to the processor, wherein the second interface is to be used for wireless local area network (WLAN) communications and to support the VoIP calls.

31. (Unchanged) The apparatus of claim 27, wherein the housing further includes a finger print sensor to be used for authentication.

32. (Currently Amended) The system of claim 27, further comprising:
a keyboard coupled to the processor, the keyboard included in [a] the keyboard tray[. the keyboard tray having a stand attached to and foldable from the housing to support the housing in a substantially upright position].

33. (Currently Amended) An apparatus, comprising:
a housing including a display, a processor coupled to the display, a
Bluetooth communication interface, and a wireless local area network
(WLAN) communication interface;
a handle coupled to the housing, the handle is to include an antenna to be used

Assignee: Intel Corporation

for wireless communication using the WLAN communication interface;
and

a keyboard tray coupled to the housing, the keyboard tray is to include a
keyboard and is coupled to a stand, wherein the stand is foldable relative
to the housing and is to support the housing in a generally upright position.

34. (Unchanged) The apparatus of claim 33, wherein the housing further includes
a speaker and one or more microphones oriented in generally same direction as
the display.

35. (Unchanged) The apparatus of claim 34, wherein the housing further includes
a video camera and a fingerprint sensor oriented in generally same direction as
the display.

36. (Currently Amended) The apparatus of claim 33, wherein the keyboard tray
further includes a remote control to control execution of an application displayed
on the [flat screen] display [screen] via the Bluetooth communication interface.

37. (Unchanged) The apparatus of claim 33, wherein the keyboard tray further
includes a telephone handset to communicate with the Bluetooth communication
interface and to be used for voice over Internet protocol (VoIP) calls via the
WLAN communication interface.

38. (Unchanged) An apparatus, comprising:
a frame to support a housing in an upright position;
a tray partially enclosed by the frame and slide-able into or out of the frame,

Assignee: Intel Corporation

wherein the tray is to include a wireless keyboard;
a wireless remote control adapted to rest on the tray to a first side of the
wireless keyboard; and
a wireless telephone handset adapted to rest on the tray to a second side of the
wireless keyboard.

39. (Unchanged) The apparatus of claim 38, wherein the wireless keyboard, the
wireless remote control, and the wireless telephone handset are to operate using
Bluetooth communication protocol.

40. (Unchanged) The apparatus of claim 38, wherein the frame is attached to the
housing and foldable from the housing to support the housing in the upright
position.
